

FOR SALE: Tower, antenna, rotator, etc. (10 Dec 2009)

Selling crank-up self-supporting tower with rotator, controller, thrust bearing, tri-bander beam as well as a 2 meter beam. Also two long runs of RG-213 low-loss coax cables and rotator control cable and all original manuals included. Tower is the hy-Gain all steel model HG-52SS, 52' extended and 21' nested. Beam antenna covering the low bands is popular 4 element (two driven) KLM KT-34A trapless tribander. Bell type rotator is the well-known hy-Gain Ham IV Rotator with shack controller and cable included. The 15 element 2 meter beam is the Cushcraft Model 215WB broad band boomer. A thrust bearing is included along with hy-Gain HG-COA Coax Arms.

This equipment has been in use at the W4ITJ shack for many years and has provided reliable world-wide ham radio contacts with all continents as well as the Russian MIR space satellite.

Located in Oak Ridge TN (near Knoxville) Can send pics. Pick up only. Asking \$2000 for all. Would prefer to sell as a complete package, but would consider selling individual pieces.
